Real Time Tracking & Communication

A Powerful Database

- Tracks student interaction for instructors to remotely monitor participation and respond to questions.
- Allows certified instructors to create detailed reports showing student participation, time spent, and more.

Reports Current scope: Micham Export to Excel

Student Progress Report - 7 results

Last Name	First Name	Reg Date	Total Time	Last Visit	Unit1	Unit2	Unit3
Barrill	Luke	3/20/2007	07:22:30.4950000	4/4/2007 9:45:00 AM	77	95	96
Belack	Jesse	2/9/2007	18:25:22.2860000	12/20/2007 10:13:30 AM	92	98	89

current systems

Instructor/student interaction

- Promotes student responsibility for course content
- Allows trainers to communicate with students and gauge learning.
- Provides assurance all students have completed assignments and are ready for final assessments.

Web-ROM Program Delivery

A Web-ROM combines rich video with online and database capabilities to deliver a robust multimedia experience, regardless of Internet connection.

Quality Instruction

Self-paced direction and quality, in-depth content maintain interest, while quizzes and study guide questions provide feedback.

Tracking & Accountability

Each Web-ROM has a unique user ID participants enter during installation. This ID is the fingerprint that allows the database to track user activity.
