Table of Contents

Introduction: Overview of Fire Ecology.....1

Section 1: Wildland Fire Management.....11

1.1 Evaluating Stand Fire History.....12
- Exercise 1.1: Conduct an On-site Evaluation of Stand Fire History.....15

1.2 Measuring Fuel Loading.....19
- Exercise 1.2a: Measure Fuel Loading in a Stand.....30
- Exercise 1.2b: Measure Fuel Loading in a Southern Pine Stand (supplemental).....39

1.3 Evaluating Forest Stands for Fire Risk.....45
- Exercise 1.3: Predict Potential Fire Behavior in a Stand.....46

Section 2: Prescribed Burning.....53

2.1 Measuring Temperature & Relative Humidity.....54
- Exercise 2.1: Measure and Analyze Sites for Temperature and Relative Humidity.....55

2.2 Measuring Fuel Moisture Content.....74
- Exercise 2.2: Measure Fuel Moisture Content at Various Sites.....81

2.3 Smoke Management Screening.....83
- Exercise 2.3a: Identify Smoke-sensitive Areas Using Maps.....89
- Exercise 2.3b: Conduct an On-site Smoke Management Screening.....90

2.4 Writing a Prescribed Burn Plan.....91
- Exercise 2.4: Write a Prescribed Burn Plan.....102

Section 3: Living on the Edge: the Wildland/Urban Interface.....105

3.1 When Fire Meets Structure: the Wildland/Urban Interface.....106
- Exercise 3.1a: Evaluate and Modify a Virtual Home.....108
- Exercise 3.1b: Evaluate and Modify a Virtual Community.....109
- Exercise 3.1c: Conduct On-site Evaluation of Homes.....111
- Exercise 3.1d: Conduct an On-site Evaluation of a Community.....113

3.2 Wildfire Protection Planning.....118
- Exercise 3.1a: Design a "Firewise" Virtual Community.....119
- Exercise 3.1b: Create a Community Wildfire Protection Plan.....121

Glossary.....125

Appendix.....133

Wildland Fire Risk and Hazard Severity Assessment Instructions.....135
Wildland Fire Risk and Hazard Severity Assessment.....137
Description of the 40 Fuel Models.....139
Description of the 13 Fuel Models.....181
NFDRS Fuel Model Classifications.....197

Index.....207
