

Directions for downloading the Maryland Forests Forever Patch on the Mac:

Web Address: <http://www.itm-info.com/mdffpatch>

This patch will correct two highlighting errors on the posttest.

- Question number 3: answer **b** (not c) should be highlighted as the correct answer after student makes an answer choice.
- Question number 9: answer **b** (not a) should be highlighted as the correct answer after student makes an answer choice.

Directions:

1. **INSTALL CD-ROM:** Be sure to install your Maryland Forests Forever CD-ROM before downloading the patch.
2. **DOWNLOAD PATCH:** Click the button labeled, "Download Mac patch." On most computers the patch will automatically download to your desktop. However, if your internet browser preferences has a different location chosen to download items, the patch will download there.
3. **UNSTUFF:** The downloaded patch, "post.dxr.sit" should automatically unstuff when it is downloaded. If nothing happens after the download is complete, double-click "post.dxr.sit" to initiate the unstuffing process. The unstuffing process will place a file, "post.dxr" , in the location where the patch downloaded.
4. **PATCH:** Find the folder "MarylandFF" that was created when the original Maryland Forests Forever CD-ROM was installed. Open it and find the folder labeled "media." Drag the unstuffed patch file, "post.dxr" into the media folder. Click "yes" if it asks you if you want to replace an existing file of the same name.
5. **TEST:** Now run the Maryland Forests Forever CD-ROM. The highlighting error should be corrected.
